

AN OPTIMAL

INDOOR CLIMATE

ON THE AGENDA...

Air conditioning in hotels and conference centres

One of the most important aspects for hotels and conference centres is to make sure that guests have a pleasant experience. A healthy and comfortable indoor climate plays an important role here. This is influenced, among other things, by optimum air humidity. If the air is too dry, people emit moisture from their water balance into the atmosphere. This causes the skin, lips and eyes to dry out which can negatively impact a person's general well-being.

Dry air can also affect the function of the mucous membranes in the respiratory channels and makes it less capable of protecting the human body against bacteria and viruses. Humidified air binds dust particles much better than dry air. Reduced dust deposits and air circulation can minimise any respiratory problems for allergy or asthma sufferers.

The advantages at a glance

- Creates a healthy and work-friendly environment for guests and staff
- Increases employee performance
- Reduces dust pollution for allergy or asthma sufferers
- Protects against electrostatic discharge
- Increases object value and attractiveness for organisers and companies

An optimal indoor climate
for commerce, education and leisure
