

BEST STEAM FOR HEALTH, RELAXATION AND WELL-BEING

Cleansing and soothing air humidity

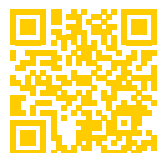

The focus in spa and wellness is on health and relaxation. Controlled heat in combination with hygienic steam provides a cleansing effect in numerous wellness applications. Relieving, caring and soothing air humidity increases the well-being of body and spirit.

Steam generators generate the finest water vapour and thus provide steam baths, saunas and relaxation rooms with a relative humidity of up to 100%. The positive effect of steam can be further enhanced by adding essential oils.

HygroMatik supplies sustainable solutions for steam generation for various spa and wellness applications in continuous commercial use as well as for the private spa.

The advantages at a glance

- Gentle stimulation of blood circulation and metabolism
- Body detoxification and purification by sweating out harmful substances
- Cleansing of the airways, mucosal moistening and prevention of colds
- Strengthening of the immune system and body's defences
- Relaxing effect on the nervous system

Hygienic steam generation
for spa and wellness applications
