

AN OPTIMAL

INDOOR CLIMATE

PROMOTES HEALTH

Air humidification in hospitals and doctor's surgeries

Patient treatment and recovery is the main focus of hospitals and doctor's surgeries. A health-promoting indoor climate is therefore a very important building block in the entire range of a medical facility.

With regard to indoor air conditioning in the healthcare sector, standards and regulations usually have to be observed: Guidelines such as DIN 1946-4 in Germany, ÖNorm H 6021 in Austria, SWKI VA104-01 in Switzerland and etc. The strict hygiene requirements for the entire ventilation and humidification system require the use of equipment that is highly reliable and easy and thorough to clean. Humidification systems certified by accredited institutes offer the security of verifiable, durable and safe compliance with these binding regulations.

The advantages at a glance

- Improves patient well-being due to optimal indoor climate
- Increases employee performance
- Ensures adherence to hygienic conditions
- Complies with strict hygiene regulations (e.g. in operating theatres)
- Reduces dust pollution for allergy or asthma sufferers
- Protects against dangerous electrostatic charge

An optimal indoor climate
for commerce, education and leisure

We take responsibility for
more sustainability.
