

StandardLine

Steam humidifier in stainless steel housing

The HygroMatik StandardLine with the option “stainless steel” is preferably used in industries that require a housing made of uncoated material due to strict hygienic regulations and cleaning methods.

The brushed stainless steel housing is particularly corrosion-resistant, easy to clean and therefore meets the highest hygiene standards. In addition, the steam humidifier naturally offers the well-known advantages that characterize all StandardLine units.

The advantages at a glance

- Extremely robust brushed stainless steel housing
- Fast and thorough cleaning possible
- Use in hygienically sensitive areas
- Easy installation and operation
- Low maintenance requirements

The following StandardLine devices are available in stainless steel housings:

Design	Performance classes	Types
Electrodes	5-30 kg/h	SLE05 / SLE10 / SLE15 / SLE20 / SLE30
Heater type	3-25 kg/h	SLH03 / SLH06 / SLH09 / SLH15 / SLH25

Your HygroMatik Team will be happy to advise you.
